DETAILED ACTION

Response to Arguments

Applicant's arguments, with respect to both sets of rejections, can be summarized as follows:

The claims read that the housing comprises a vapor supply line and that the vapor supply line directs a moistening atmosphere toward the back of the spray device.

Since both references (Behmel and Rosenberger) teach that the supply line directs a liquid (and not a vapor) to the spray device, they fail to read on the applicant's claims.

This argument is found unconvincing. It is the position of the examiner that there is no positive recitation in the claims that vapor is being directed to the spray device.

As for the limitation of "vapor supply line", it is the position of the examiner that this fails to specifically read on supplying vapor to the spray device. In a first argument, applicant's use of the term "vapor supply line" only reads on a pipe, or a line capable of directing vapor. It is the position of the examiner that, as the limitation is currently constructed, there is no requirement of vapor being directed by the vapor supply line. In a second argument, it is noted that since humidity is measured in the housings of both references, the lines in question are indeed supplying vapor to the housing. Although the lines may be directing a liquid to the spray device, the device converts at least some

Art Unit: 1762

of this liquid to vapor. Therefore, the supply lines are eventually supplying vapor to the housing and consequentially read on being a "vapor supply line".

As for the limitation of directing a "moistening atmosphere" to the spray device, it is the position of the examiner that this fails to specifically read on being a vapor. "Atmosphere" may be defined as "any surrounding or pervading influence or condition". This definition in no way requires "atmosphere" to be a vapor or gas. From this definition, a liquid may comprise an atmosphere.

Therefore, the examiner has considered the request for reconsideration. The request, and arguments concurrently filed with it, however, fails to put the application in condition for allowance.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric B Fuller whose telephone number is (703) 308-6544. The examiner can normally be reached on Mondays through Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive Beck, can be reached at (703) 308-2333. The fax phone numbers for the organization where this application or proceeding is assigned are 703 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
